

What can you do to stay safe in a digital world

Cyber Crime

Cyber criminals use both indiscriminate **trawling** and targeted **line phishing** tactics to land their catch – don't get caught

of security breaches are as a result of mistakes by users by way of social engineering attacks
Don't throw open your doors

Reduce the likelihood of successful social engineering attacks
80%** of attacks can be defeated using technical controls

Keep People and Security Controls Updated

Regularly update employees about the latest phishing attacks and dangers. Maintain procedures for what to do if the worst happens.

Implement a robust information security management system (ISMS) to provide an end-to-end view, guidance and oversight.

Let VOSO be your guide to improved employee awareness and up-to-date technical defences.
